Table of contents

EDITORIAL REVIEW

Biological actions and pathophysiologic significance of endothelin in the kidney. *Valentina Kon and Kamal F. Badr* 1

LABORATORY INVESTIGATION

Reversible compensatory hypertrophy in transplanted Brown Norway rat kidneys. *Monique Churchill, Paul C. Churchill, Melvin Schwartz, Anil Bidani, and Franklin McDonald* 13

Atrial natriuretic peptide and dopamine in established acute renal failure in the rat. *John D. Conger, Sandor A. Falk, and William S. Hammond* 21

Role of growth hormone in the development of experimental renal scarring. *A. Meguid El Nahas, Andrew H. Bassett, Geoff H. Cope, and Jayne E. Le Carpentier* 29

Puromycin aminonucleoside metabolism by glomeruli and glomerular epithelial cells in vitro. *Gian Marco Ghiggeri, Giovanni Cercignani, Fabrizio Ginevri, Roberta Bertelli, Lucia Zetta, Fulvia Greco, Giovanni Candiano, Antonella Trivelli, and Rosanna Gusmano* 35

Antiserum against tumor necrosis factor-alpha and a protease inhibitor reduce immune glomerular injury. *Zbigniew W. Hruby, Kinji Shirota, Serge Jothy, and Robin P. Lowry* 43

Expression of αB-crystallin in the developing rat kidney. *Toru Iwaki, Akiko Iwaki, Ronald K.H. Liem, and James E. Goldman* 52

Dietary protein restriction and glomerular permselectivity in nephrotoxic serum nephritis. *Joel Neugarten, Arthur Kozin, Robert Gayner, Robert G. Schacht, and David S. Baldwin* 57

Acute and chronic changes in renal function following unilateral nephrectomy. *David G. Shirley and Stephen J. Walter* 62

Organ distribution of erythropoietin messenger RNA in normal and uremic rats. *Chorh C. Tan, Kai-uwe Eckardt, and Peter J. Ratcliffe* 69

Toxicity of peritoneal dialysis fluids on cultured fibroblasts, L-929. *Anders P. Wieslander, Marika K. Nordin, Per T.T. Kjellstrand, and Ulf C. Boberg* 77

CLINICAL INVESTIGATION

Influence of antiidiotypic antibody activity on renal transplant outcome. *Ibrahim A. Al-Muzairai, Radboud Dolhain, Yvonne Taylor, Keith N. Stewart, Margaret MacMillan, Graeme R.D. Catto, and Alison M. MacLeod* 80

Cytokine-activated human mesangial cells generate the neutrophil chemoattractant, interleukin 8. *Zarin Brown, Robert M. Strieter, Stephen W. Chensue, Miroslav Ceska, Ivan Lindley, Guy H. Neild, Steven L. Kunkel, and John Westwick* 86

Mechanisms of angioplasty in hemodialysis fistula stenoses evaluated by intravascular ultrasound. *Charles J. Davidson, Glenn E. Newman, Khalid H. Sheikh, Katherine Kisslo, Richard S. Stack, and Steve J. Schwab* 91

Inhibition of immunoglobulin production by parathyroid hormone. Implications in chronic renal failure. *Zbigniew Gaciong, Jadwiga M. Alexiewicz, Mariana Linker-Israeli, Ira A. Shulman, Thomas O. Pitts, and Shaul G. Massry* 96

Volume 40, Supplement 33, July 1991

Proton, Bicarbonate and Chloride Transport in the Kidney

Satellite Symposium to the XIth International Congress of Nephrology

Nara, Japan

July 22–24, 1990

Table of contents

Introduction. *Hyoe Ishikawa, Mamoru Fujimoto, and Masashi Imai* S-1

Proton, bicarbonate and chloride transport in the kidney—Summary of the Nara Symposium 1990. *Eberhard Frömter* S-2

Protons and regulation of biological functions. *Vadivel Ganapathy and Frederick H. Leibach* S-4

Intracellular pH regulation in epithelial cells. *Leonard K. Chen and Walter F. Boron* S-11

Illumination, wavelength selection, and detection in fluorescence microscopy. *Kenneth R. Spring* S-18

Ion-selective microelectrodes to study proton and bicarbonate transport in the renal epithelium. *Mamoru Fujimoto, Takahiro Kubota, Nobuko Hagiwara, Takako Ohno-Shosaku, Manabu Kubokawa, and Kunihiko Kotera* S-23

Chronic adaptations in proximal tubular H/HCO_3 transporters. *Robert J. Alpern, Shigeo Horie, Orson Moe, Alberto Tejedor, R. Tyler Miller, and Patricia A. Preisig* S-29

Role of the loop of Henle in urinary acidification. *Giovambattista Capasso, Robert Unwin, and Gerhard Giebisch* S-33

Regulation of bicarbonate and ammonium absorption in the thick ascending limb of the rat. *David W. Good* S-36

Mechanisms of H^+/HCO_3^- transport in the medullary thick ascending limb of rat kidney. *Pascale Borensztein, Françoise Leviel, Marc Froissart, Pascal Houillier, Josiane Poggioli, Eric Marty, Maurice Bichara, and Michel Paillard* S-43

Cortical collecting duct bicarbonate secretion. *Victor L. Schuster* S-47

Mechanism and regulation of proton transport in the outer medullary collecting duct. *Harry R. Jacobson, Hiroaki Furuya, and Matthew D. Breyer* S-51

Morphological adaptation of the collecting duct to acid-base disturbances. *Kirsten M. Madsen, Jill W. Verlander, Jin Kim, and C. Craig Tisher* S-57

Biochemical aspects of H^+–ATPase in renal proximal tubules: Inhibition by *N,N'*-dicyclohexylcarbodiimide, *N*-ethylmaleimide, and bafilomycin. *Kirsten Jehmlich, Jutta Sablotni, Bernt J. Simmon, and Gerhard Burckhardt* S-64

Characterization and control of proton-ATPase along the nephron. *Chakir Khadouri, Lydie Cheval, Sophie Marsy, Catherine Barlet-Bas, and Alain Doucet* S-71

Colchicine-induced redistribution of proton pumps in kidney epithelial cells. *Dennis Brown, Ivan Sabolic, and Stephen Gluck* S-79

Molecular biology of renal Na^+–H^+ exchangers. *Peter Igarashi, Robert F. Reilly, Friedhelm Hildebrandt, Daniel Biemesderfer, Nancy A. Rebouças, Carolyn W. Slayman, and Peter S. Aronson* S-84

Role of Ca^{2+}/H^+ antiporter in the kidney. *Yusuke Tsukamoto, Kazunobu Sugimura, and Wadi N. Suki* S-90

Contents continued on next page

NH_4^+ transport in the kidney. *Mark A. Knepper* S-95

Transport mechanisms in kidney proximal tubule examined using chloride-sensitive fluorescent indicators. *A. S. Verkman, Lan-Bo Shi, Hae-Rahn Bae, and Kiyohide Fushimi* S-103

Transcellular chloride transport in the proximal tubules: Mechanisms and physiological significance. *Sei Sasaki, Kenichi Ishibashi, and Fumiaki Marumo* S-109

Selectivity of ion permeability across ascending thin limb of Henle's loop: Interaction of Cl^- and other halogens with anion transport system. *Taisuke Isozaki, Koji Yoshitomi, and Masashi Imai* S-113

Ion channel regulation in the thick ascending limb of the loop of Henle. *R. Greger, M. Bleich, and E. Schlatter* S-119

Cellular mechanisms of chloride transport in the cortical collecting duct. *Paul Dietl, Erik Schwiebert, and Bruce A. Stanton* S-125

Cellular mechanisms of Cl^- transport in outer medullary collecting duct. *Bruce Koeppen, Christopher Pappas, Thomas Manger, and Analisa Oyler* S-131

Instructions for Authors on page iv

Volume 40, Number 2, August 1991

Official Journal of the International Society of Nephrology

Le Journal Officiel de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Proteolytic enzymes as mediators of glomerular injury. *William H. Baricos and Sudhir V. Shah*. 161

LABORATORY INVESTIGATION

Lymphatic removal of dialysate from the peritoneal cavity of anesthetized sheep. *Nevin J. Abernethy, Warren Chin, John B. Hay, Helen Rodela, Dimitrios Oreopoulos, and Miles G. Johnston* 174

Doses of endothelin have natriuretic effects in conscious rats with cirrhosis and ascites. *Joan Clària, Wladimiro Jiménez, Vicente Arroyo, Anna Castro, Mònica Asbert, Josefa Ros, Francisca Rivera, and Joan Rodés* 182

Dual mechanism of angiotensin II inhibits ANP-induced mesangial cGMP accumulation. *Masakazu Haneda, Ryuichi Kikkawa, Shiro Maeda, Masaki Togawa, Daisuke Koya, Naoki Horide, Nobuyuki Kajiwara, and Yukio Shigeta* 188

Cause of variable therapeutic efficiency of angiotensin converting enzyme inhibitor on glomerular lesions. *Masaaki Ikoma, Tetsuya Kawamura, Yoshihiko Kakinuma, Agnes Fogo, and Iekuni Ichikawa* 195

Stimulated kidney tubular epithelial cells express membrane associated and secreted TNFα. *Anthony M. Jevnikar, Daniel C. Brennan, Gary G. Singer, John E. Heng, Wowo Maslinski, Rudolf P. Wuthrich, Laurie H. Glimcher, and Vicki E. Rubin Kelley* 203

Effects of $1,25(OH)_2D_3$ on compensatory renal growth in the growing rat. *Stephan Matthias, Reinhold Busch, Jürgen Merke, Gerhard Mall, Monique Thomasset, and Eberhard Ritz* 212

Calcitonin, an important factor in the calcemic response to parathyroid hormone in the rat. *Mariano Rodriguez, Arnold J. Felsenfeld, Armando Torres, Lee Pederson, and Francisco Llach*. 219

Mesangial structure and function in the remnant kidney. *Melvin M. Schwartz and Anil K. Bidani* 226

CLINICAL INVESTIGATION

Improvement of leucocytic Na^+K^+ pump activity in uremic patients on low protein diet. *Michel Aparicio, Philippe Vincendeau, Christian Combe, Jocelyne Caix, Henri Gin, Valérie de Precigout, Jean-Henri Bezian, Jean-Louis Bouchet, and Luc Potaux* 238

Nature and extent of glomerular injury induced by cyclosporine in heart transplant patients. *Tullio Bertani, Paolo Ferrazzi, Arrigo Schieppati, Piero Ruggenenti, Amando Gamba, Lucio Parenzan, Giuliano Mecca, Norberto Perico, Ornella Imberti, Andrea Remuzzi, and Giuseppe Remuzzi* ... 243

Insulin increases sodium reabsorption in diluting segment in humans: Evidence for indirect mediation through hypokalemia. *Cylla E. Friedberg, Marjolijn van Buren, Joost A. Bijlsma, and Hein A. Koomans* 251

Effects of hemodialysis on platelet-derived thrombospondin. *Meinrad P. Gawaz and Richard A. Ward* 257

Regulation of interleukin-2 and interferon-γ gene expression in renal failure. *Lisya Gerez, Liora Madar, Tamar Shkolnik, Batya Kristal, Gila Arad, Ayelet Reshef, Asnat Steinberger, Mali Ketzinel, Dror Sayar, Shaul Shasha, and Raymond Kaempfer* 266

Protective action of glycine in cisplatin nephrotoxicity. *Samuel N. Heyman, Seymour Rosen, Patricio Silva, Katherine Spokes, Merrill J. Egorin, and Franklin H. Epstein* 273

Contents continued on next page

Urine glycosaminoglycans in congenital and acquired nephrotic syndrome. *Lyda P. Jadresic, Guido Filler, and T. Martin Barratt* 280

Stimulation of beta$_2$-microglobulin synthesis in lymphocytes after exposure to Cuprophan dialyzer membranes. *Bernhard Jahn, Margarita Betz, Reinhold Deppisch, O. Janssen, Gerhard Maria Hänsch, and Eberhard Ritz* 285

Glucocorticoid activates glomerular antioxidant enzymes and protects glomeruli from oxidant injuries. *Tetsuya Kawamura, Toshimasa Yoshioka, Teresa Bills, Agnes Fogo, and Iekuni Ichikawa*. 291

Effect of salt supplementation on amphotericin B nephrotoxicity. *Alejandro Llanos, Javier Cieza, Jose Bernardo, Juan Echevarria, Italo Biaggioni, Ramzi Sabra, and Robert A. Branch*..... 302

Acute renal failure with preserved renal plasma flow induced by cancer immunotherapy. *Alain Mercatello, Aoumeur Hadj-Aïssa, Sylvie Négrier, Bernard Allaouchiche, Bernard Coronel, Eve Tognet, Monique Bret, Marie Favrot, Nicole Pozet, Jean-François Moskovtchenko, and Thierry Philip*..... 309

Computer simulations of peritoneal fluid transport in CAPD. *Bengt Rippe, Gunnar Stelin, and Börje Haraldsson* 315

NEPHROLOGY FORUM

Dietary protein restriction in patients with chronic renal failure. *William E. Mitch* 326

Table of contents

EDITORIAL REVIEW

Primary hyperoxaluria: Therapeutic strategies for the 90's. *Jon I. Scheinman* 389

LABORATORY INVESTIGATION

Elimination of *Candida albicans* from kidneys of mice during short-term systemic infections. *Abolghasem Baghian and Kenneth W. Lee* 400

Renal functional reserve in treated and untreated hypertensive rats. *Luca De Nicola, Roland C. Blantz, and Francis B. Gabbai* 406

Impaired potassium-induced insulin secretion in chronic renal failure. *George Z. Fadda, Prasert Thanakitcharu, Roderick Comunale, Loren G. Lipson, and Shaul G. Massry* 413

Binding inhibitors restore furosemide potency in tubule fluid containing albumin. *Kent A. Kirchner, James R. Voelker, and D. Craig Brater* 418

Initiation and evolution of interstitial leukocytic infiltration in experimental glomerulonephritis. *Hui Y. Lan, David J. Paterson, and Robert C. Atkins* 425

TMB-8 prevents the hydroosmotic response to ADH in rabbit cortical collecting tubules. *Maurilo Leite, Jr., Diane Rouse, Eleanor Lederer, Joel Abramowitz, and Wadi N. Suki* 434

Potassium permeable channels in primary cultures of rabbit cortical collecting tubule. *Brian N. Ling, Cynthia F. Hinton, and Douglas C. Eaton* 441

A glomerular permeability factor produced by human T cell hybridomas. *Akio Koyama, Masami Fujisaki, Masaki Kobayashi, Masaya Igarashi, and Mitsuharu Narita* 453

Role for "uremic toxin" in the progressive loss of intact nephrons in chronic renal failure. *Masaru Motojima, Fuyuhiko Nishijima, Masaaki Ikoma, Tetsuya Kawamura, Toshimasa Yoshioka, Agnes B. Fogo, Tadasu Sakai, and Iekuni Ichikawa* 461

Demonstration of PDGF B-chain mRNA in glomeruli in mesangial proliferative nephritis by in situ hybridization. *Ashio Yoshimura, Kathy Gordon, Charles E. Alpers, Jürgen Floege, Pam Pritzl, Russell Ross, William G. Couser, Daniel F. Bowen-Pope, and Richard J. Johnson* 470

Increased synthesis of extracellular matrix in mesangial proliferative nephritis. *Jürgen Floege, Richard J. Johnson, Katherine Gordon, Hiroyuki Iida, Pamela Pritzl, Ashio Yoshimura, Caryl Campbell, Charles E. Alpers, and William G. Couser* 477

CLINICAL INVESTIGATION

Effect of dialysis and renal transplantation on autonomic dysfunction in chronic renal failure. *Anupam Agarwal, Inder S. Anand, Vinay Sakhuja, and Kirpal S. Chugh* 489

Reduced lipid concentrations during four years of dialysis with low molecular weight heparin. *Heinz Jürgen Deuber and Walter Schulz* 496

Renal, cardiovascular and hormonal characteristics of young adults with autosomal dominant polycystic kidney disease. *Stephen B. Harrap, David L. Davies, Ann M. Macnicol, Anna F. Dominiczak, Robert Fraser, Alan F. Wright, Michael L. Watson, and J. Douglas Briggs* 501

C-erb B-2 amplification in cystic renal disease. *Guillermo A. Herrera* 509

Histopathologic findings associated with a chronic, progressive decline in renal allograft function. *Bertram L. Kasiske, Roberto S.N. Kalil, Hyun Soon Lee, and K. Venkateswara Rao* 514

Contents continued on next page

Sodium modeling in hemodiafiltration. *Luciano A. Pedrini, Renato Ponti, Pietro Faranna, Giorgio Cozzi, and Francesco Locatelli* 525

Elevated urinary excretion of the C5b-9 complex in membranous nephropathy. *Matthias Schulze, James V. Donadio, Jr., Charles J. Pruchno, Patricia J. Baker, Richard J. Johnson, Rolf A.K. Stahl, Sandra Watkins, Donald C. Martin, Reinhard Wurzner, Otto Gotze, and William G. Couser* 533

Branched-chain amino acid in chronic renal failure patients: Respiratory and sleep effects. *Eldar Söreide, Björn Skeie, Olli Kirvelä, Robert Lynn, Nancy Ginsberg, Tuula Manner, David P. Katz, and Jeffrey Askanazi* 539

NEPHROLOGY FORUM

Pheochromocytoma: New concepts and future trends. *Emmanuel L. Bravo* 544

Table of contents

EDITORIAL REVIEW

Angiotensin actions in the kidney: Renewed insight into the old hormone. *Iekuni Ichikawa and Raymond C. Harris* 583

LABORATORY INVESTIGATION

Interleukin-1β stimulates human mesangial cells to synthesize and release interleukins-6 and -8. *Frances Abbott, James J. Ryan, Miroslav Ceska, Kouji Matsushima, Catherine E. Sarraf, and Andrew J. Rees* 597

Changes in intracellular sodium during the hydroosmotic response to vasopressin. *Andrew S. Brem, Karen L. Matheson, Maryann Pacholski, Karen Inman, and Ronald Lawler* 606

Visceral peritoneum is not essential for solute transport during peritoneal dialysis. *Stephen D. Fox, John K. Leypoldt, and Lee W. Henderson* 612

Morphometric study of glomerular slit diaphragms fixed by rapid-freezing and freeze-substitution. *Takeshi Furukawa, Shinichi Ohno, Hisao Oguchi, Kumiko Hora, Shinichi Tokunaga, and Seiichi Furuta* 621

Red cell trapping and postischemic renal blood flow. Differences between the cortex, outer and inner medulla. *P. Olof A. Hellberg, Örjan Källskog, and Mats Wolgast* 625

Early renal medullary hypoxic injury from radiocontrast and indomethacin. *Samuel N. Heyman, Mayer Brezis, Franklin H. Epstein, Katherine Spokes, Patricio Silva, and Seymour Rosen* 632

Renal entactin (nidogen): Isolation, characterization and tissue distribution. *Avi Katz, Alfred J. Fish, Mary M. Kleppel, Steven G. Hagen, Alfred F. Michael, and Ralph J. Butkowski* 643

Mesangial cell behavior in a three-dimensional extracellular matrix. *Masanori Kitamura, Tetsuya Mitarai, Naoki Maruyama, Ryuji Nagasawa, Hiroaki Yoshida, and Osamu Sakai* 653

Impaired insulin secretion of aging: Role of renal failure and hyperparathyroidism. *Shaul G. Massry, George Z. Fadda, Xin-Jin Zhou, Parakrama Chandrasoma, Linda Cheng, and Charles R. Filburn* 662

Isolation of a novel complement regulatory factor (GCRF) from glomerular epithelial cells. *Richard J. Quigg* 668

Glomerular renin synthesis and storage in the remnant kidney in the rat. *Mark E. Rosenberg, Ricardo Correa-Rotter, Tadashi Inagami, Stefan M. Kren, and Thomas H. Hostetter* 677

Role of ornithine decarboxylase for proliferation of mesangial cells in culture. *Eckhard Schulze-Lohoff, Karl Brand, Hans Fees, Roland Netzker, and Ralf Bernd Sterzel* 684

Distribution of epidermal growth factor in the kidneys of rats exposed to amikacin. *Gérard Toubeau, Denis Nonclercq, Jacqueline Zanen, Patrick Lambricht, Paul M. Tulkens, Jeanine-Anne Heuson-Stiennon, and Guy Laurent* 691

Sigmoidal relationship between calcitonin and calcium: Studies in normal, parathyroidectomized, and azotemic rats. *Armando Torres, Mariano Rodriguez, Arnold Felsenfeld, Alejandro Martin-Malo, and Francisco Llach* 700

Effect of mesangial cell lysis and proliferation on glomerular hemodynamics in the rat. *Tadashi Yamamoto, Carol A. Mundy, Curtis B. Wilson, and Roland C. Blantz* 705

Contents continued on next page

CLINICAL INVESTIGATION

Acute intradialytic well-being: Results of a clinical trial comparing polysulfone with cuprophan. *Bergamo Collaborative Dialysis Study Group* 714

Decreased postheparin lipolytic activity in renal transplant recipients with cyclosporin A. *Kurt Derfler, Michael Hayde, Gottfreid Heinz, Michael M. Hirschl, Günther Steger, Anna-Christine Hauser, Peter Balcke, and Kurt Widhalm* 720

Epidemiologic study of analgesic abuse: Mortality study in 7275 working women (1968–1987). *Ulrich C. Dubach, Bernard Rosner, and Til Stürmer* 728

Angiotensin II does not acutely reverse the reduction of proteinuria by long-term ACE inhibition. *Jan E. Heeg, Paul E. de Jong, Gjalt K. van der Hem, and Dick de Zeeuw* 734

Role of platelet activating factor in gentamicin and cisplatin nephrotoxicity. *Oscar F. Pavão dos Santos, Mirian A. Boim, Elvino J.G. Barros, and Nestor Schor* 742

Hepatitis C virus infection among kidney transplant recipients. *Esther Ponz, Josep M. Campistol, Miguel Bruguera, Josep M. Barrera, Cristina Gil, Joao B. Pinto, and Jordi Andreu* 748

Long-term results of renal transplantation in children. *Donald E. Potter, John Najarian, Folkert Belzer, Malcolm A. Holliday, Gloria Horns, and Oscar Salvatierra, Jr.* 752

Plasma exchange in focal necrotizing glomerulonephritis without anti-GBM antibodies. *Charles D. Pusey, Andrew J. Rees, David J. Evans, D. Keith Peters, and C. Martin Lockwood* 757

Angiotensin II receptor-mediated proliferation of cultured human fetal mesangial cells. *Patricio E. Ray, Greti Aguilera, Jeffrey B. Kopp, Satoshi Horikoshi, and Paul E. Klotman* 764

Renal ammoniagenesis in humans with chronic potassium depletion. *Alberto Tizianello, Giacomo Garibotto, Cristina Robaudo, Stefano Saffioti, Roberto Pontremoli, Mario Bruzzone, and Giacomo Deferrari* 772

Metabolic acidosis and skeletal muscle adaptation to low protein diets in chronic uremia. *Bryan Williams, Jane Hattersley, Ellis Layward, and John Walls* 779

RAPID COMMUNICATION

Anti-interleukin-1α autoantibodies in hemodialysis patients. *Gere Sunder-Plassmann, Peter Ludwig Sedlacek, Raute Sunder-Plassmann, Kurt Derfler, Klaus Swoboda, Veronika Fabrizii, Michael Maria Hirschl, and Peter Balcke* 787

Table of contents

EDITORIAL REVIEW

Racial differences in the incidence and progression of renal diseases. *Stephen R. Smith, Laura P. Svetkey, and Vincent W. Dennis* 815

LABORATORY INVESTIGATION

Analysis of Na^+-D-glucose cotransporter and other renal brush border proteins in human urine. *Horst-Walter Birk, Stefan Piberhofer, Georg Schütterle, Winfried Haase, Jochem Kötting, and Hermann Koepsell* 823

Distribution of tubulointerstitial nephritis antigen and evidence for multiple forms. *Ralph J. Butkowski, Mary M. Kleppel, Avi Katz, Alfred F. Michael, and Alfred J. Fish* 838

Glomeruli synthesize nitrite in active Heymann nephritis; the source is infiltrating macrophages. *Victoria Cattell, Penelope Largen, Emile de Heer, and Terence Cook* 847

Renal immunopathology in murine host-versus-graft disease. *Sandrine Florquin, Daniel Abramowicz, Emile de Heer, Jan Anthonie Bruijn, Jean-Marc Doutrelepont, Michel Goldman, and Philip Hoedemaeker* 852

Impaired in vivo antibody production in CRF rats: Role of secondary hyperparathyroidism. *Zbigniew Gaciong, Jadwiga M. Alexiewicz, and Shaul G. Massry* 862

Subfractions in uremic plasma ultrafiltrate inhibit calcitriol metabolism. *Chen H. Hsu, Raymond Vanholder, Sanjeev Patel, Rita R. De Smet, Patrick Sandra, and Severin M.G. Ringoir* 868

Effects of methylprednisolone on glomerular and medullary mRNA levels for extracellular matrices in puromycin aminonucleoside nephrosis. *Tsukasa Nakamura, Isao Ebihara, Mitsumine Fukui, Yasuhiko Tomino, and Hikaru Koide* 874

Chronic tubulointerstitial changes induced by germanium dioxide in comparison with carboxyethylgermanium sesquioxide. *Toru Sanai, Seiya Okuda, Kaoru Onoyama, Nobuaki Oochi, Shigeko Takaichi, Vinci Mizuhira, and Masatoshi Fujishima* 882

Hydrogen peroxide cytotoxicity in LLC-PK_1 cells: A role for iron. *Patrick D. Walker and Sudhir V. Shah* 891

CLINICAL INVESTIGATION

Differentially regulated cell surface expression of leukocyte adhesion receptors on neutrophils. *Vicente Alvarez, Rafael Pulido, Miguel R. Campanero, Vicente Paraiso, Manuel O. de Landázuri, and Francisco Sánchez-Madrid* 899

Stable cell line of T-SV40 immortalized human glomerular visceral epithelial cells. *Françoise Delarue, Angela Virone, Jacqueline Hagege, Roger Lacave, Marie-Nëlle Peraldi, Colette Adida, Eric Rondeau, Jean Feunteun, and Jean-Daniel Sraer* 906

T-lymphocyte subsets in nephrotic syndrome. *Richard T. Fiser, Watson C. Arnold, Ronald K. Charlton, Russell W. Steele, Sherri H. Childress, and Belinda Shirkey* 913

Bone marrow changes following treatment of renal anemia with erythropoietin. *Jörg H. Horina, Christine R. Schmid, Johannes M. Roob, Hanns M. Winkler, Michael A. Samitz, Heinz F. Hammer, Helmut Pogglitsch, and Guenter J. Krejs* 917

Urinary albumin, transferrin and iron excretion in diabetic patients. *Randy L. Howard, Bruce Buddington, and Allen C. Alfrey* 923

Contents continued on next page

In vivo effect of 1,25-dihydroxyvitamin D_3 on phagocyte function in hemodialysis patients. *Eugen Hübel, Thomas Kiefer, Jochen Weber, Thomas Mettang, and Ulrich Kuhlmann* 927

Prevention of hemodialysis subclavian vein catheter infections by topical povidone-iodine. *Adeera Levin, A. Jane Mason, Kailash K. Jindal, I. William Fong, and Marc B. Goldstein* 934

Elevated plasma levels of the immunosuppressive complement fragment Ba in renal failure. *Martin Oppermann, Christian Kurts, Ruprecht Zierz, Elmar Quentin, Michael H. Weber, and Otto Götze* 939

Medical and social outcome in adolescents with end-stage renal failure. *Janet M. Roscoe, Lesbia F. Smith, E. Alexander Williams, Moni Stein, A. Ross Morton, J. Williamson Balfe, and Gerald S. Arbus* 948

Cytomegalovirus infection of human kidney cells in vitro. *Jarkko A. Ustinov, Raisa J. Loginov, Pirkko M. Mattila, Virpi K. Nieminen, Jukka I. Suni, Pekka J. Häyry, and Irmeli T. Lautenschlager* 954

NEPHROLOGY FORUM

Regulation of renal ammoniagenesis in metabolic acidosis. *Anton C. Schoolwerth* 961

Volume 40, Supplement 34, November 1991

Balkan Endemic Nephropathy

Two International Workshops:

Belgrade, Yugoslavia

October 16–20, 1989 and October 10–12, 1990

Table of contents

Introduction. *Philip W. Hall, III and Vecihi Batuman* S-1

EPIDEMIOLOGY AND ENVIRONMENTAL FACTORS

Environmental renal disease: Lead, cadmium and Balkan endemic nephropathy. *Richard P. Wedeen* S-4

Relationship between weathered coal deposits and the etiology of Balkan endemic nephropathy. *Gerald L. Feder, Zoran Radovanović, and Robert B. Finkelman* S-9

Selenium deficiency and Balkan endemic nephropathy. *Zoran J. Maksimović* S-12

Early detection of tubular dysfunction. *Magnus Piscator* S-15

Altered urinary β_2-microglobulin excretion as an index of nephrotoxicity. *Fouad A. Rashad, Christina V. Vacca, Theodore Speroff, and Philip W. Hall, III* S-18

β_2-microglobulin in patients with Balkan nephropathy and in healthy members of their families. *Vladisav Stefanović, Marina Mitić-Zlatković, Rade Čukuranović, Predrag Miljković, Nikola M. Pavlović, and Predrag Vlahović* S-21

Urinary protein excretion in children from families with Balkan nephropathy. *Predrag Miljković, Spira Strahinjić, Philip W. Hall, III, Vidosava Djordjević, Marina Mitić-Zlatković, and Vladisav Stefanović* S-27

β_2-microglobulinuria as a predictor of death in a population exposed to Balkan endemic nephropathy. *Zoran Radovanović, Vojislav Danilović, Dragiša Velimirović, Todor Naumović, Ivana Jevrevomić, Slavenka Janković, Christina Vacca, and Philip W. Hall, III* S-32

β_2-microglobulinuria in a population exposed to Balkan endemic nephropathy: Inferences from repeated cross-sectional studies. *Ivana Jevremović, Slavenka Janković, Zoran Radovanović, Vojislav Danilović, Dragiša Velimirović, Todor Naumović, Christina Vacca, Milorad Stamenković, Dana Bukvić, Vaclava Stojanović, Staljinka Trbojević, and Philip W. Hall, III* S-35

β_2-microglobulin studies in endemic Balkan nephropathy. *Ante Hrabar, Borislav Aleraj, Stjepan Čeović, Dubravka Čvoriščec, Christina Vacca, and Philip W. Hall, III* S-38

A fifteen year cohort based evaluation of β_2-microglobulin as an early sign of Balkan endemic nephropathy. *Ante Hrabar, Borislav Aleraj, Stjepan Čeović, Dubravka Čvoriščec, Christina Vacca, and Philip W. Hall, III* S-41

CLINICAL PATHOLOGY

Relationship of anemia to Balkan endemic nephropathy. *Ante Hrabar, Stjepan Čeović, Borislav Aleraj, Dubravka Čvoriščec, and Philip W. Hall, III* S-44

Anemia in Balkan endemic nephropathy. *Vera Pavlović-Kentera, Ljubica Djukanović, Gisela K. Clemons, Staljinka Trbojević, Nada Dimković, and Andjelka Slavković* S-46

Renal function, protein excretion and pathology of Balkan endemic nephropathy. I. Renal function. *Senaid Trnačević, Ahmet Halilbašić, Dušan Ferluga, Đuro Plavljanić, Alenka Vizjak, Huseir Duraković, Vildana Habul, Enisa Mesić, Goran Imamović, Jovan Hranisavljević, Mirzada Pašić, and Goran Paunović* S-49

Contents continued on next page

Renal function, protein excretion and pathology of Balkan endemic nephropathy. II. Protein excretion. *Smiljana Raičević, Senaid Trnačević, Jovan Hranisavljević, and Dušan Vučelić*.... S-52

Renal function, protein excretion, and pathology of Balkan endemic nephropathy. III. Light and electron microscopic studies. *Dušan Ferluga, Asta Hvala, Alenka Vizjak, Senaid Trnačević, and Ahmet Halilbašić* S-57

Renal function, protein excretion, and pathology of Balkan endemic nephropathy. IV. Immunohistology. *Alenka Vizjak, Senaid Trnačević, Dušan Ferluga, and Ahmet Halilbašić* S-68

BEN AND TUMORS

Incidence of tumors of urinary organs in a focus of Balkan endemic nephropathy. *Zoran Radovanović, Slavenka Janković, and Ivana Jevremović* S-75

Balkan endemic nephropathy and papillary transitional cell tumors of the renal pelvis and ureters. *Vladimir J. Petronić, Nikola S. Bukurov, Milan R. Djokić, Dragica Z. Milenković, Aleksandar M. Vuksanović, Aleksandar D. Avramović, and Djordje P. Nale* S-77

Urinary tract tumors and Balkan nephropathy in the South Morava River basin. *Rade Čukuranović, Milić Ignjatović, and Vladisav Stefanović* S-80

ETIOLOGY AND PATHOPHYSIOLOGY

Survey of small molecule and ion binding to β_2-microglobulin—Possible relation to BEN. *Viktor N. Morozov, Tamara Ya Morozova, Paul Bray, Jovan Hranisavljević, and Dušan Vučelić*.... S-85

Possible pathogenetic role of low-molecular-weight proteins in Balkan nephropathy. *Vecihi Batuman* S-89

Erythrocyte δ-aminolevulinate dehydratase measurements in Balkan endemic nephropathy. *V.B. Djordjević, Spira Strahinjić, D. Koračević, Predrag Miljković, Vidosava Djordjević, D. Pavlović, and Vladisav Stefanović* S-93

Spontaneous and induced chromosome aberrations in Balkan endemic nephropathy. *Draga I. Toncheva, Tsvetan D. Gergov, Maria T. Tzoneva, and Zdravko P. Bouchakliev* S-97

Partial lecithin:cholesterol acyltransferase (LCAT) deficiency in Balkan endemic nephropathy. *Nikola M. Pavlović, Z. Varghese, J.W. Persaud, Vladisav Stefanović, Spira Strahinjić, V. Savić, and John F. Moorehead* S-102

KIDNEY INTERNATIONAL

Volume 40, Number 6, December 1991

Official Journal of the International Society of Nephrology

Le Journal Officiel de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Polycystic kidney disease: Clues to pathogenesis. *Patricia Gabow* 989

LABORATORY INVESTIGATION

Localization and polar distribution of several G-protein subunits along nephron segments. *Nigel Brunskill, Bahar Bastani, Catalina Hayes, Jerry Morrissey, and Saulo Klahr* 997

Possible role of tumor necrosis factor and interleukin-1 in the development of diabetic nephropathy. *Goji Hasegawa, Koji Nakano, Manabu Sawada, Kazuko Uno, Yoji Shibayama, Kazuharu Ienaga, and Motoharu Kondo* 1007

Characterization of myosin heavy and light chains in cultured mesangial cells. *Masahiro Hiraoka-Yoshimoto, Kosuke Higashida, Michio Takeda, Sachiyo Kawamoto, Iekuni Ichikawa, and Richard L. Hoover* 1013

Pathogenesis of interstitial fibrosis in chronic purine aminonucleoside nephrosis. *Colin L. Jones, Shilpa Buch, Martin Post, Lori McCulloch, Elaine Liu, and Allison A. Eddy* 1020

Growth hormone prevents steroid induced growth depression in health and uremia. *Gabòr Kovàcs, Richard N. Fine, Stefan Worgall, Franz Schaefer, Ernst B. Hunziker, Anna Skottner-Lindun, and Otto Mehls* 1032

Reactive oxygen species and rat renal epithelial cells during hypoxia and reoxygenation. *Mark S. Paller and Thomas V. Neumann, with the technical assistance of Emily Knobloch and Marsha Patten* 1041

Deterioration of GFR in IgA nephropathy as measured by ^{51}Cr-EDTA clearance. *Sakari Rekola, Anders Bergstrand, and Härje Bucht* 1050

Calcemic response to parathyroid hormone in renal failure: Role of phosphorus and its effect on calcitriol. *Mariano Rodriguez, Alejandro Martin-Malo, Maria E. Martinez, Armando Torres, Arnold J. Felsenfeld, and Francisco Llach* 1055

Calcemic response to parathyroid hormone in renal failure: Role of calcitriol and the effect of parathyroidectomy. *Mariano Rodriguez, Arnold J. Felsenfeld, and Francisco Llach* 1063

Complement activation retards resolution of acute ischemic renal failure in the rat. *Gerald Schulman, Agnes Fogo, Alice Gung, Kamal Badr, and Raymond Hakim* 1069

Receptor-mediated increase in cytosolic calcium in LLC-PK$_1$ cells by platelet activating factor and thromboxane A$_2$. *Norishi Ueda, Philip R. Mayeux, Patrick D. Walker, and Sudhir V. Shah* 1075

Electrophysiology of ammonia transport in renal straight proximal tubules. *Harald Völkl and Florian Lang* 1082

Thromboxane mediates renal hemodynamic response to infused angiotensin II. *Christopher Wilcox, William J. Welch, and Harold Snellen* 1090

CLINICAL INVESTIGATION

Pregnancy in IgA nephropathy. *Shinichi Abe* 1098

Adrenergic modulation of extrarenal potassium disposal in men with end-stage renal disease. *Michael Allon and Nancy Shanklin* 1103

Contents continued on next page

Effects of acetate dialysate on transforming growth factor β_1, interleukin, and β_2-microglobulin plasma levels. *John Anderson, Gary Briefel, Joe M. Jones, J.H. Ryu, Marielena McGuire, and Yeo Pyo Yun* 1110

Increased sodium-lithium countertransport activity in red cells of IgA nephropathy patients. *Roberto Boero, Ezio Degli Esposti, Alba Fabbri, Cesare Guarena, Giacomo Forneris, Francesco Quarello, Maurizio Fusaroli, and Giuseppe Piccoli* 1118

Adherence of neutrophils to hemodialysis membranes: Role of complement receptors. *Alfred K. Cheung, Mary Hohnholt, and Janice Gilson* 1123

Renal functional reserve: Its significance in normal and salt depletion conditions. *Bruno Memoli, Carmelo Libetta, Massimo Sabbatini, Giuseppe Conte, Domenico Russo, Umberto Giani, Domenico Capone, and Vittorio E. Andreucci* 1134

Measurement of SC5b-9 in urine in patients with the nephrotic syndrome. *James L. Ogrodowski, Lee A. Hebert, Daniel Sedmak, Fernando G. Cosio, John Tamerius, and William Kolb* 1141

Anaphylactoid reactions in hemodialysis patients treated with the AN69 dialyzer. *Eliezer L. Parnes and Warren B. Shapiro* 1148

Factors predictive of post-transplant erythrocytosis. *Wajeh Y. Qunibi, Yousri Barri, E. Devol, Othman Al-Furayh, Kirtikant Sheth, and Saadi Taher* 1153

Simultaneous catheter replacement and removal in refractory peritoneal dialysis infections. *Richard Swartz, Joseph Messana, Janice Reynolds, and Uday Ranjit* 1160

TECHNICAL NOTE

Tumor necrosis factor (TNFα) binding protein: Interference in immunoassays of TNFα. *Nurit Haran, Yaacov Bar-Khyim, Asher Frensdorff, and Geoffrey Barnard* 1166

Cimetidine improves the reliability of creatinine as a marker of glomerular filtration. *Lukas B. Hilbrands, Marika A. Artz, Jack F.M. Wetzels, and Robert A.P. Koene* 1171

NEPHROLOGY FORUM

Vitamin D and calcium transport. *Rajiv Kumar* 1177

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 1191

Awards and Grants 1194

ACKNOWLEDGMENT OF REFEREES 1199

INDEX TO VOLUME 40 1205

KIDNEY INTERNATIONAL

Volume 40, Supplement 35, December 1991

Virus-Related Renal Diseases

Satellite Symposium to the XIth International Congress of Nephrology

Kyongju, Republic of Korea

July 22–24, 1990

Table of contents

Introduction. *Kwang Wook Ko and Han Chul Park* S-1

Primary and secondary role of viruses in chronic renal failure. *Stephen I. Vas* S-2

Immune complex-induced glomerular injury in viral diseases: An overview. *Richard J. Glassock* S-5

Pathogenesis of human cytomegalovirus disease and the kidney. *J.G. Patrick Sissons, John H. Sinclair, and Leszek K. Borysiewicz* S-8

Clinical features of human immunodeficiency virus associated nephropathy. *T.K. Sreepada Rao* S-13

The nephropathology in human immunodeficiency virus (HIV-1) infection. *Jacques J. Bourgoignie and Victoriano Pardo* S-19

Worldwide perspective of hepatitis B-associated glomerulonephritis in the 80s. *Micheline Levy and Nan Chen* S-24

Immunopathogenetic mechanisms of hepatitis B virus-related glomerulopathy. *Yasuo Takekoshi, Hiroyuki Tochimaru, Yasushi Nagata, and Noritomo Itami* S-34

Clinical features and the natural course of hepatitis B virus-related glomerulopathy in adults. *Kar Neng Lai and Fernand Mac-Moune Lai* S-40

Clinical features and natural course of HBV-related glomerulopathy in children. *Ching-Yuang Lin* S-46

Etiology and epidemiology of hemorrhagic fever with renal syndrome. *Evgeniy A. Tkachenko and Ho-Wang Lee* S-54

Nephropathia epidemica: Mild variant of hemorrhagic fever with renal syndrome. *Yrjö Collan, Michael J. Mihatsch, Juhani Lähdevirta, Eero J. Jokinen, Timo Romppanen, and Esa Jantunen* S-62

Mechanisms of disease in hemorrhagic fever with renal syndrome. *Thomas M. Cosgriff and Richard M. Lewis* S-72

Clinical features of hemorrhagic fever with renal syndrome in Europe. *Charles van Ypersele de Strihou* S-80

Clinical studies on hemorrhagic fever with renal syndrome found in Nagoya City University Medical School. *Toshihiko Takeuchi, Toshiyuki Yamamoto, Makoto Itoh, Katsuhiko Tsukada, Naoji Yasue, and Ho Wang Lee* S-84

Clinical features of hemorrhagic fever with renal syndrome in Korea. *Jung Sang Lee* S-88
